Parents! Here’s a special opportunity for your young scholar. Kids Learn STEM Summer Camp is five action-packed days of hands-on, brains-on fun for grades 5 to 8! Led by Cal Poly faculty, your student will “Learn By Doing” as we test solar panels, build wind turbines and investigate the energetics of chemical reactions. Participants will work in small teams to develop and solve scientific challenges, explore the Cal Poly Campus and visit real research laboratories!

Space is limited.

Don’t let your student miss this experience!
